

BRIEF PROFILE

The Municipality of Calasiao is the second oldest town in the Province of Pangasinan. It was founded by the Dominicans in 1588, a year after the founding of Binalatongan (now San Carlos City).

Calasiao was originally a small settlement near the town of Gabon. Because the inhabitants in Gabon were hostile, the Dominican missionaries staying in the area. They convinced the chiefs of the settlement staying of Nalsian and Dinalaoan and Calasiao fused to form the new town of Calasiao. Gabon, although it was a much bigger settlement in the beginning, was relegated into being a mere barangay of Calasiao.

The town’s Roman Catholic church was designed as San Pablo de Calasiao in 1596. This was however renamed San Pedro Y San Pablo de Calasiao in the same year that it was enlarged.

Calasiao takes pride in being one of the first and one of the new town’s in Pangasinan that openly resisted the Spanish oppression during those times. Calasiao was one of the first towns of Pangasinan that joined the Malong Rebellion of 1660-1661.

It joined the forces of Andres Malong of Binalatongan in its desire for retribution against Spanish malpractices. In another uprising against Spanish rule, led by Juan Dela Cruz Palaris of Binalatongan, Calasiao was again one of the ten rebel towns that succeeded in driving the Spanish ruler and friars out of their boundaries.

The town’s Roman Catholic Church was designated as San Pablo de Calasiao in 1596. This was however renamed San Pedro Y San Pablo De Calasiao in the same year that it was enlarged.

Day Care Centers	33

CALASIAO MAP

A. HISTORICAL DEVELOPMENT

1. Historical Background

When a place in the Philippines is named, the residents often refer to their patron saints for inspiration or to any native plants or animals that grow and live in the place. In the case of the Municipality of Calasiao, the place was named after a natural occurrence. Calasiao was taken from the native word *kalasian*, which means "a place where lightning frequently occurs", with the root word, *lasi*, which means "lightning". It was named as such because it is said that Calasiao back then was always frequented by this natural phenomenon. When the Spaniards came to the Philippines in the 1500's during their colonization efforts, they also called the place, "*Lugar de Rayos*", a literal Spanish translation of the word *kalasian*.

The native people of Calasiao descended from the Austronesian-speaking people who settled in the Malay Archipelago about 5,000 years ago. The place now called Calasiao was then settled by Pangasinan-speaking people whose language belongs to the Malayo-Polynesian branch of the Austronesian languages family. The Municipality of Calasiao was founded by the Dominicans in the year 1588. Calasiao is the second oldest town in the Province of Pangasinan established by the Spaniards next only to San Carlos (then called Binalatongan) which was established in 1574.

The Spanish conquest of Pangasinan began in 1571. The Spanish *conquistadores* were accompanied by Roman Catholic missionaries who introduced Roman Catholicism to the indigenous peoples of Pangasinan. Around 1592, the small settlement of Calasiao was merged with the other neighboring small settlements of Nalsian and Dinalaoan to form the new town of Calasiao. The much larger settlement of Gabon and other settlements nearby also became part of the now expanding town of Calasiao. Calasiao as a town became part of the Pangasinan *encomienda* of Labaya, designated as belonging to the King of Spain, Juan Ximenezdel Pino, and a son of Alonso Hernandez de Sandoval for whom tributes were regularly collected from the residents. Augustinian and Dominican missionaries converted most of the indigenous people of Calasiao to Roman Catholicism. In 1596, the Roman Catholic convent in Calasiao was built and named

San Pablo de Calasiao. In 1621, the convent was renamed San Pedro y San Pablo de Calasiao. The convent is located in the town center or *poblacion*.

With the various developments both social and economic instituted at Calasiao, the municipality is now positioned to become another leading urban center in Pangasinan next at the heels of nearby Dagupan City and San Carlos City.

2. Economic Situation

The Municipality will continue to be an agricultural town in the next few years. It will continue to supply the neighboring municipalities in the province with its agricultural produce such as crops, vegetables and livestock.

B. HUMAN RESOURCES

This sector presents the demographic characteristics of the Municipality of Calasiao, Pangasinan in terms of its historical growth, population composition and distribution, dependency ratio, literacy rate and marital status, among others Population Projection are also made, based on the computed rate of population change.

1. Historical growth of Population

The municipality of Calasiao has a total population of 103,987 residents based on the 2023 Municipal Survey.

Table No.1
Historical growth of Population

Year	Population	Increase (Decrease)	Annual Growth rate
1903	16,539		
1908	16, 960	421	0.17
1939	19,325	2,365	0.62
1948	23,269	3,944	2.09
1960	29,330	6,061	1.95
1970	38,576	9,246	2.78
1975	43,640	5,064	2.50
1980	48,101	4,461	1.97
1990	62,966	14,865	2.73
1995	69,538	6,582	2.0
2000	77,039	7,511	2.07
2007	85,419	8,380	1.49
2010	91,109	5,690	2.17

2015	95,154	4,045	0.89
2023	103,987	3,516	1.16

Data Source: Philippine Statistics Authority/Municipal Survey

2. Population Composition

Based on the most recent data, majority of the population of Calasiao is classified under the working age group (15-64 years old) totaling to 68,683 residents. For the males, 33% are in this age group while for the females, 32% are in the same age group. The dependent population (ages 0 to 14 and 65 years old and above) when combined translates to 17% for the males and 17% for the females. Also based on the collected data, the males outnumber the females except for the age group of 65 year old and above. A sex ratio higher than 100 means that there are more males while a sex ratio lower than 100 indicates a predominance of females.

3. Population Distribution

Out of the recorded population of 103,987 in 2023, 62,624 or 60.22 percent of the total population belong to the urban population while 41,363 or 39.78 percent were in the rural areas.

A total of 27,793 households were recorded in 2023 Municipal Survey; of which 17,063 or 61.39 percent of the total households belong to the urban population while 38.60 percent or 10,730 were in the rural areas. The average household size is 4 persons per household.

4. Population Density

The total population density of Calasiao based on the 2023 data is 21 persons per hectare which was arrived at by dividing the total population of 103,987 over 4,873.00 hectares occupied by the municipality. The urban barangays of Poblacion East have the highest density with 116 and 98 persons per hectare respectively while the highest density in terms of the rural barangays is Brgy. Gabon with 98 persons per hectare. The population density of the whole of Calasiao is 21 persons per hectare.

5. Population Projection and Households

The population of Calasiao, Pangasinan stood at 103,987 as of 2023 having increased by 3,516 persons from the recorded population of 100,471 in the 2020 Census of Population and Housing. Between 2020 and 2023, thus, the average annual population growth of the municipality registered at 1.16%. Based on this growth percentage, the population of Calasiao is expected to grow to 110,160 by year 2028 and 116,699 by year 2033. Alongside this growth is the increase in household by year 2028 to 29,443 and by year 2033 to 31,191 coming from 27,793 for the year 2023. On the average, five (4) members per family or household is used to compute for the earlier mentioned figures on household population projections

Table Number: 4
Population and Household Projection
CY 2023-2033

Year	Population	Household
2023	103,987	27,793
2024	105,193	28,115
2025	106,413	28,442
2026	107,648	28,771
2027	108,897	29,105

2030	112,730	30,130
2031	114,038	30,479
2032	115,361	30,833
2033	116,699	31,191

Figure Number 1: Projected Population & Household CY 2023-2033

The projected population by barangay shown on the table below with its base year 2023 as its base year. Assuming all other things are held at constant, the new urban population shall gain an average increase of 1,616 persons annually until it reaches the total population of 115,201 persons by the year 2024. Parallel to it, the rural population shall increase annually by an average of 594 persons and shall reach a total population of 42,334 when the planning period ends. Ideal population growth rate has been pegged at 2% or below per annum. At an annual average growth rate of 1.69%, the municipality shall be able to cope with its population increase. However, since the municipality is already heavily populated in the context of its limited land space as well as the expansion of the urban areas, plans for economic and social opportunities must be completed properly by the municipality to prevent any problems that may arise

The projected urban population would reach 70,280 by end of 2033, where Barangay Buenlag accounts a total population of 9,443 which rank number 1, while Barangay San Miguel ranks number 2 populated barangay of 8,755 and Barangay Ambonao has 7,962 which rank number three populated barangay. However, barangay Poblacion West is the least urban populated barangay with a total population of 1,154.

The projected rural population would reach 46,419 by year 2033 compared to 2023 rural population of 41,363 or an increase of 5,056 population. With this rural projected population, Barangay Talibaew ranks number 1 of 5,615; while barangay Malabago ranks number 2 with a population of 4,965 and the 3rd populated urban barangay is Dibalaoan with a projected population of 4,755. The least populated rural barangay is San Vicente with a projected population of 2,380.

B. PHYSICAL FEATURES

1. Geographic Location and Territorial Jurisdiction

The municipality is bounded on the north by the City of Dagupan; on the south by the City of San Carlos; on the northeast by the Municipality of Mangaldan; and on its east by the Municipality of Sta. Barbara. Calasiao is situated at 16° 0' 0" N latitude and 120° 20' 60" E longitude. (Map No. 1 Location Map).

MAP NO. 1 Location Map

2. Land Area Classification

The municipality has total land area coverage of 4,873.0000 hectares. The urban area comprises 2,866.0000 hectares or 58.81% of the total land area while the rural area comprises of 2,007.0000 hectares or 41.19% of the total land area of the whole municipality. The total agricultural lands at present comprise 3,132.9400 hectares or 64.29% of the total land area of the municipality. (Map No.2-3 General and Urban base maps).

Map No.2 General Base Map

Map No.3 Urban Base Map

3. Barangay Subdivision

The Municipality of Calasiao is subdivided into 24 barangays. There are twelve (12) barangays classified as urban and twelve (12) are classified as rural. The biggest barangay in terms of land area is Buenlag with 472.00 hectares, comprising 10.50% of the total municipal area, followed by barangay Macabito with 374.00 hectares or 7.67% of the total land area. The smallest barangay in terms of land area is barangay Poblacion East with only 15.00 hectares or 0.31% share of the total municipal area of Calasiao.

1. SOIL

There are 4 types of soil found in the Municipality of Calasiao. These are the following: (a) San Manuel Silt Loam with 2,000.37 hectares; (b) Pangasinan Fine Sand with 2,821.96 hectares and (c) San Manuel Silt Clay 366.20 hectares (d) Hydrosol with 150.47 hectares.

Table No. 7
Soil Type

Soil Type	Description	Area (Has)	% to Total
San Manuel Silt Clay	The surface soil is silty clay; slightly sticky; 30 to 35 centimeters thick. It easily puddles and becomes hard when dry. The subsoil and stratum are more or less similar to those of other San Manuel Soils.	366.20 hectares	6.86%

Pangasinan Fine Sand	This type of sand is a naturally occurring granular material composed of finely divided rock and mineral particles.	2,821.96 hectares	52.86%
San Manuel Silt Loam	The surface soil is coarse granular; and mellow when moist.	2,000.37 hectares	37.47%
Hydrosols	Hydrosols are soils which are seasonally or permanently saturated (for at least 2-3 months per year). Hydrosols are suited to both rice and corn planting.	150.47 hectares	2.82 %

2. TOPOGRAPHY AND SLOPE

The terrain of Calasiao is relatively flat. About 100% of the total municipal area is nearly level (0% to 4%). This singular characteristic of the municipality allows for maximum development of any residential, commercial or industrial projects. This land characteristic is also considered useful for paddy rice culture or for other crops suitable to the local soil and climatic conditions (Map no. 5 Topographic Map).

3. VEGETATION COVER

The Municipality's vegetation cover consists of tropical trees such as ipil-ipil, mangoes and grassy landscape, flat areas are usually planted with rice, corn, root crops and others.

4. SURFACE WATER/DRAINAGE

Surface water resources in the municipality consist of the three (3) River sand its tributary creeks

5. Non-Mineral resources

Sand and Gravel, used for hollow blocks making, are the most promising non-mineral resources in the municipality.

C. PHYSICAL INFRASTRUCTURE

1. Transportation Sector

- Inventory of Roads

The Municipality of Calasiao has a total road length of 106.91 kilometers, out of which 14.608 kilometers are national roads; 28.2365 kilometers are provincial roads; 13.07 kilometers are municipal roads and 106 kilometers are barangay roads.

The national roads occupy an area of 292.16 hectares; provincial roads occupy an area of 423.55 hectares; the municipal roads have 130.7 hectares and the barangay roads roads with 848 hectares, giving a total of 1,694.41 hectares or 31.73 percent of the total municipal land area.

- Type of Pavement

The Municipality of Calasiao has a total of 70.063 kilometers of paved roads (concrete and asphalt) representing around 43.27 percent of the total road length, while 50.55 kilometers or 31.22 percent remained unpaved.

- Traffic Volume

No records has been availed of as to the volume of traffic in the municipality, as of this writing the municipality has no problem on traffic congestion. Traffic Management in the municipality is well implemented.

- Bridges

Based on actual survey and per records of the Municipal Engineering Office, there are five (5) national bridges namely: Gabon located at brgy. Gabon, Bolosan at brgys Nalsian/Banaoang, Ramos located at San Miguel/Ambonao, Villamil Bridge located at Poblacion East-West/Lasip/Talibaew, and Malabago bridge which is located at brgy. Malabago/Doyong/Nagsaing.

2. Power

The Municipality of Calasiao is 100% energized by Dagupan Electric Cooperative (DECORP) and the Central Pangasinan Electric Cooperative (CENPELCO).

3. Water

The Municipality of Calasiao has 1 households served with level I private source and 1,709 households served with Level I Public Source, and 11,542 households served using level III water connection.

2. Communication

Communication facilities available in the Municipality of Calasiao are the two telecommunications providers: the USATV and PLDT. USATV and PLDT provides both internet and telephone services. - (20kg/day) = 600kg/mo

- **FISH CLEANINGS**

- 5kg/day = 150kg/mo

- **FOOD/KITCHEN WASTE**

10g/day = 300 kg/mo

SOCIAL SERVICES

1. Education

Education in its general sense is a form of learning in which knowledge, skills and habits of a group of people are transferred from one generation to the next through teaching, training and research. A right to education has been created and recognized by some jurisdiction.

In line with classification enunciated by the National Building Code of the Philippines. School buildings in the Municipality of Calasiao are categorized under the semi-permanent and permanent structure. The existing land area occupied by education sector is estimated at more than 28 hectares.

The above school buildings have complete facilities/utilities are required under the Space Requirements of the Department of Education vis-avis number of enrollees as of calendar year.

2. Social Welfare

Social Welfare--- The Day Care Services are located all over the municipality catering to the early education needs of children 3 to 5 years old. Although established to watch over the children especially for working mothers, it has also instructional functions, providing pre-school services to the children.

Majority of the daycare centers are accommodated by Barangay Halls. Others are renting which needs to be considered for provision of a permanent place due to the increasing number of children and for future needs. Some churches provide place for the same purpose.

In compliance to RA 6972, “An Act Establishing a Day Care Center in Every Barangay”, the Municipality of Calasiao at present has 34 DCC’s. Though there is the Senior citizens Office in the MSWDO and Senior Citizen’s Associations have been established in every barangay, there is as yet no Senior Citizen Center yet established in the municipality as required by RA 7876. Compliance to AO No. 82 Ss. 2003 standards on Social Welfare and Development Service Delivery System in the LGU is not yet, therefore, complete.

3. Housing

Housing is a building or structure that individuals and their family may live. Housing is the basic need of every human that will cover, protect, or support another thing. RA 7279 is specifically concerned with the provision of shelter for the underprivileged and the homeless. To ensure allocation of land and services even to the lowest income groups, it is crucial to estimate the total shelter needs of all income groups in the Municipality of Calasiao. Shelter needs are categorized into: new housing units needed to answer the requirements of the future population, new units to cover for housing backlog as well as upgrading need.

Based on the sectoral studies (volume 3) of the Comprehensive Land Use Plan, the existing housing need based on the household is 33,057 housing while the projected housing need for calendar year 2024 is 40,973.

The proposed 2 hectares for the informal settlers identified site for socialized housing, this aim to prevent of homeless in Calasiao and as an effective measure in ensuring the safety, comfort and welfare of the poor families of Calasiao.

The existing land area for housing is 313.12 hectares, while the projected land area is 544.94 hectares, or 10.20% of the municipal total land area this means that the existing land area could supply the housing demand for calendar year 2024.

Land is the most critical among the resources for a shelter program not only because the supply is a fixed quantity but also because a number of activities and uses are in competition with one another for access to the same land. High income housing is in competition with low income housing for land just a commercial and industrial activities are in competition with housing in general. Furthermore, recent policies of the national government stress the need to conserve production agricultural lands specifically those that are irrigated or irrigable. Although RA 7279 mandates LGU's to inventory and identify lands specifically for socialized housing sufficient quantities of land should be identified for all income groups not only for the present needs but also for all needs within the planning period. The Municipal Planning Team of Calasiao has to determine the total land are needed and match this with available and suitable land. The land needed will be estimated for the duration of the planning period on the basis of present design standards and number of different housing options. Minimum lot sizes or bigger lot sizes under Batas Pambansa BLG. 220 PD 957 can be used depending on the local situation.

RA 7279

RA 7279 is specifically concerned with the provision of shelter for the underprivileged and the homeless. To ensure allocation of land and services even to the lowest income groups, it is crucial to estimate the total shelter needs of all income groups in the Municipality concerned. Shelter needs are categorized into new housing units needed to answer the requirements of the future population, new units to cover for the housing backlog as well as upgrading needed.

Socialized Housing

The Municipality of Calasiao has identified site for Socialized Housing located at Barangay Doyong with 14,762 square meters and 10 hectares in barangay Mancup/Talibaew. This aims to provide housing to ther least fortunate of the locality

to address housing backlog of 973. The land identified for Socialized Housing is outside Strategic Agricultural Zone based on the SAFDZ Map Classification of the Municipal Agricultural Office. The land area being proposed for Socialized Housing could accommodate 1,255 housing units using the 64 square meters-Single Detached (BP 220) Housing Standards includes the roads and open spaces.

Land is the most critical among the resources required for a shelter program not only because the supply is a fixed quantity but also because a number of activities and uses are in competition with one another for access to the same land. High income housing is in competition with low income housing for land just a commercial and industrial activities are in competition with housing in general. Furthermore, recent policies of the national government stress the need to conserve production agricultural lands specifically those that are irrigated or irrigable. Although RA 7279 mandates the LGUs to inventory and identify lands specifically for socialized housing sufficient quantities of land should be identified for all income groups not only for the present needs but also for all needs within the planning period. The Municipal Planning Team to determine the total land area needed and match this with available and suitable land. The land needed will be estimated for the duration of the planning period on the basis of present design standards and number of different housing options. Minimum lot sizes or bigger lot sizes under Batas Pambansa Bldg. 220 (BP 220) can be used depending on the local situation.

HEALTH PERSONNEL and FACILITIES, PUBLIC and PRIVATE

HEALTH- PUBLIC

The Municipal Health Office (MHO) is located at Barangay Poblacion East with an approximately 5,266 sq. meters.

The Municipal Health Office Personnel (MHO) are the following:

- 1-Municipal Health Doctor
- 1-Municipal Health Dentist (newly appointed)
- 3- Medical Technologist
- 3- Nurse
- 9- Midwives
- 3- Rural Sanitary Inspector
- 2- Ambulance Driver
- 39-Contract of Service

There are two (2) ambulance and one (1) rescue vehicle. These vehicles are used to transport patients to other hospital like the Region I Medical Center (RIMC). Provincial Hospital at Bolingit San Carlos City, Baguio General Hospital (BGH), National Orthopedic Hospital and other hospital.

Beside the Municipal Health Office (MHO) is the Municipal Calasiao Birthing Clinic which is open 24 hours with 2 nurse and 8 midwives available. The Calasiao Birthing Clinic has 6 beds with other facilities.

The **RURAL HEALTH UNIT II** is located at Barangay Buenlag with more or less two (2) hectares. These areas include the Buenlag Elementary School, High School and the Buenlag Barangay Hall.

LOCAL ECONOMY

THE PRIMARY SECTOR AGRICULTURAL PRODUCTION

Calasiao has a total land area of 5,339 hectares. Of this area, 3,055 hectares are attributed to agricultural production. Of the total agricultural land 87.81% or 2,682.5 hectares are devoted to the production of rice which is the major crop of Calasiao. More of the rice lands are rain-fed since only 1,245 hectares are irrigated. 49% of the rice-lands have yet to be irrigated. 372.5 hectares or 12.19% of the total agricultural land are grown with other crops.

The main crop produced is rice, next is corn, followed by mango. Almost all of the barangays in Calasiao cultivate rice. Mangoes are produced in barangays Doyong, Malabago and Nagsaing, while corn is produced in barangays Macabito, Dinalaoan, Doyong, Longos, Lumbang, Macabito, Malabago, Songkoy, Buenlag and also Nagsaing.

Rice is the top crop produced in Calasiao. There are two cropping seasons for the irrigated areas. For the first cropping, an estimated volume of 12,333.20 metric tons of rice are produced. The second cropping season yields 8,018.7 metric tons of rice. Corn and mango are also high-value crops in Calasiao. 466 hectares is devoted to corn production which yields 3,262 metric tons. 107 hectares of agricultural land is planted with mango and has an estimated annual yield of 1,312.5 metric tons.

LIVESTOCK AND POULTRY FARMS

Based on available data, there are 8 major farms engaged in poultry production; 4 of which are into broiler with an average production of 220,000 heads per cycle averaging 6 cycles per year. Also, 4 farms are into layer with an average production of 87,000 heads per year with an average egg production of 69,600 per day. Native chicken comprises the next with 7,539 heads.

There are twenty-one (21) barangays in the Municipality of Calasiao that operate livestock and poultry farms. Goats are raised in all of the barangays of Calasiao. Barangay Talibaew has the highest number of carabao, barangay Quesban has the highest number of swine (native) and goats, and barangay Macabito has the highest number of swine (upgraded).

There are twenty-one (21) barangays in the Municipality of Calasiao that operate livestock and poultry farms. Goats are raised in all of the barangays of Calasiao with a total of 1288 heads. Barangay Buenlag has the highest number of cattle, barangay Bued has the

highest number of swine (native), while barangay Lumbang has the highest number of swine (upgraded).

Bangus Production

Year	Growth Rate	Yield/HA
2018	52%	5200
2019	53%	5300
2020	54%	5400
2021	56%	5600
2022	60%	6000

In the next years of Bangus Production there is 10% increase in their yield.

Fish and Fishery Product Utilization

Kind of Processing	Number	Species Processed	Plant Capacity (MT)	Annual Production (MT)	Employment (male-Female)
Tinapa (smoke fish)		Galunggong	130/month	32.25	15
Fish Deboning		Bangus	150/month	1.8mt	24

There is an estimated 88.91 hectares in fishery which include fresh water with 20.1 hectares, Commercial water has 23 hectares and brackish water with 45.81 hectares. Distributed in thirteen (13) barangays more or less seventy-eight (78) fish folks are involved; and an estimated 197.99 metric tons can be harvested from mix sort of fresh fish products. Under fish processing, tinapa (galunggong) smoked fish processed about 130 kilos per month or an annual production of 31.25 metric tons with fifteen (15) female employed. While fish deboning of bangus are processed about 150 kilos per month with an annual production if 1.8 metric tons with twenty-four (24) employed all female.

FOOD SELF-SUFFICIENCY ASSESSMENT

For Calasiao to fully benefit from its agricultural sector, all support services directed to increase and sustain production and productivity has to be adequate. For the farming sector, this would mean improving the irrigation systems to increase food production.

Water impounding systems should be constructed to serve the irrigation needs of the rice growers. Post harvest facilities such as multi-purpose drying pavement and warehouses must also be constructed to accommodate the rice produced and lessen post-harvest losses. There is also a need to have the other support agricultural facilities like tractor, four-wheel tractors, milling, rice thresher, combine harvester, corn Sheller, cold storage and the like to ensure good quality of farm produce.

These agricultural support facilities and service are present in Calasiao. Thus, rice production in Calasiao is sufficient for the dietary needs of the town's population as seen in rice production and requirement (table). Assuming that every individual consumes 124 kilos of rice annually based on the standard requirements for food consumption, the rice produce in the municipality is more than enough to provide the rice needs of the people of Calasiao. This means that there is an excess of rice produced which can be sold to other towns or processed into other products like the signature product of Calasiao which is Puto.

There is also a sufficient supply on beef and eggs. The municipality however need to maintain the sustainability of supply of these commodities.

There is a deficit shortage of supply on corn (white). To minimize the deficiency, there must be a good promotion on white corn and also subsidize seed inputs.

Fruits and vegetables in Calasiao are also low in production both in lowland and upland due to the deficiency on supply and production. To resolve this problem, there is a need to promote backyard gardening and increase production support to farmers group. Provision of farm machineries and equipment in support to vegetable production, and a need of value adding training to farmers and market linkage ing to vegetable buyers and producers.

There is also a shortage of supply on chicken and pork meat due to few producers and the incidence of diseases. There is a need to encourage investment in livestock / Poultry Farm (chicken) production in Calasiao to address food sufficiency within the locality.

TRANSPORTATION

There are four (4) bus Companies operating in Calasiao. These are Dagupan Bus Line, Victory Liner, Five Star Bus Line, and the Solid North Transit Inc., these buses operate from Manila to Dagupan City through the National Highway/ diversion Road (San Miguel,

Ambonao and Bued). There are three (3) jeepney routes, one of which is from North to South serving Dagupan and San Carlos City and Bayambang town. Finally, another jeepney route connects Dagupan City with Poblacion. Other Minor routes include Barangay Malabago to Poblacion, Ambuetel to Poblacion and Dagupan to Poblacion.

Tricycles are another mode of transportation in Calasiao. The waiting points of the tricycles are at the junction point of the provincial road going toward San Carlos City and the circumferential provincial road passing through barangays Doyong, Nagsaing, Lumbang, Dianaloan and Lasip. Other waiting points are in front of the Public Market, beside Calasiao Central School, in front of the PBA building, in front of Calasiao Comprehensive National High School and in front of the Pangasinan Village Inn (which is at present not operating).

COMMUNICATIONS

Communication facilities available in the Municipality of Calasiao are the two telecommunications providers: namely the USATV, CONVERGE and the PLDT, they provides internet and telephone services, while PLDT provides for public calling stations. There is one postal services (PhilPost) located at the front right side of the Municipal Hall building. There are no means for mass communications or broadcast Networks (both for television and radio) in Calasiao although the government maintains one website for posting information about the Municipality. There are no community newspapers in circulation. However, there are several printing presses in the town and nearby barangays. As for mobile networks, smart, Globe and Sun Cellular provide the service. The Globe Cell towers are located at barangays Ambuetel, Buenlag, Quesban and San Miguel, while the Sun Cellular tower is in barangay Bued. Smart cellular towers are located at San Vicente and Buenlag.

PUBLIC MARKET

The Calasiao Public Market is located near the Municipal Hall Building, the center of government of our municipality, near the public plaza and the two (2) storey public schools, namely: Calasiao Central Elementary School and Calasiao Comprehensive National High School.

The Public Market is composed of Two Wet Markets with total land area of 1,894 square meters and Dry Market with a land area of 6,028 square meters.

Our Public Market consists of the three (3) adjacent main buildings which are all open spaces; the Wet Market with tiles stalls subdivided into Meat Section, Vegetable Section, Fish Section, Bagoong and Sari-Sari Section.

Another open building is the Wet Market II with the same sections but no fixed and tiled stalls in which the vendors provide their own tables to sell or display their goods.

And the Dry Open Market with vendors selling RTW's, footwears, groceries and general merchandise without distinct and visible measurement of stalls.

Income from Public Markets (Dry and Wet Market) comes from daily cash tickets issued to stall owners as their rental fees, while income from Livestock Vendors based on number of animals to be sold in the Market.

Rental Income comes from commercial spaces and lease rentals from Build Operated and Transfer Projects. Rentals for these spaces are collected in a monthly basis.

At present, seasonal farmer's market or "Market Day" are held on Mondays and Thursdays in Calasiao usually from 7:00 A.M. to 12 P.M. The popularity of farmer's markets is growing worldwide. This growth in farmer's market reflects the multiple benefits they bring to communities, consumers and producers; and confirms the significant role they play in local food systems.

The Municipality of Calasiao is at a pivotal point in its evolution. Despite the lingering uncertainty of the global economic situation, Calasiao is growing rapidly and it will continue to do so. This growth will result in significant new developments and of course new residents.

Public markets bring forth an array of social and societal benefits or advantages such as benefits in respect of social integration; community character and liability; health and nutrition; town's image and identity; and community activity. These social impacts also have significant economic implications.

LOCAL GOVERNMENT STRUCTURE

LGU Organizational Chart

*To date, a total of 653 municipal employees in the Municipality of Calasiao.

Broken into the following:

- 194 Permanent Status
- 12 Elective Officials
- 169 Contractual/Contract of Services
- 3 Co-Terminus
- 0 Casual
- 275 Job Order Workers

Local Fiscal management

Government

Calasiao, belonging to the third congressional district of the province of Pangasinan, is governed by a mayor designated as its local chief executive and by a municipal council as its legislative body in accordance with the Local Government Code. The mayor, vice mayor, and the councilors are elected directly by the people through an election which is being held every three years.

The town hall is located in front of the Roman Catholic convent of San Pedro y San Pablo de Calasiao, the same building as the shrine of Senor Divino Tesoro. The current mayor is Mamilyn Agustin Caramat, who took over the mayoralty post from Joseph Arman Capito Bauzon, following his victory in the May 2022 elections.

Like other towns in the Philippines, Calasiao is governed by a mayor and vice mayor who are elected to three-year terms. The mayor is the executive head and leads the town's departments in executing the ordinances and improving public services. The vice mayor heads a legislative council (Sangguniang Bayan) consisting of councilors from the Barangays of Barrios.

Elected officials

The town is led by Mayor Kevin Roy Q. Macanlalay, Vice Mayor Nestor A. Gabrillo, and eight other councilors.

MEMBERS OF THE MUNICIPAL COUNCIL 2022-2025

	ARDIESON B. SORIAN
	HAVERDANI DAS B. MESINA

	GERALD AFICIAL
	ELLIAS S. VILLANUEVA
	MYC D. SISON
	JOSE AFICIAL

Tourism

St. Peter and Paul Church (Poblacion West)

Calasiao is a short ride to the Bonuan Blue Beach and the Hundred Islands in the Lingayen Gulf. Calasiao is about 2 hour ride to Baguio City and a four-hour ride to Manila.

Calasiao is known for its puto, a soft rice cake; suman, a sweet coconut and sticky rice cake wrapped in banana leaves; and bagoong, or fermented fish paste. Calasiao puto is described as the town's "white gold." Calasiao puto is a bite-size, soft rice cake made from semi-glutinous rice that is fermented in earthen jars. It is produced mainly in Barangay Dinalaoan.

Many pilgrims from neighbouring cities/towns and provinces visit Calasiao to pray at the Senor Divino Tesoro shrine. The statue of a crucified Jesus Christ is believed to grow in size and grant miracles.

Puto festival

Special Puto (Calasiao stores).

Calasiao celebrates a puto industry festival. The Calasiao puto is a rice cake that is well known all over the Philippines for its melt-in-the-mouth feeling. It is locally sold along the streets going to Sr. Divino Tesoro.

It is known for its "white gold": "cup-shaped, bite-sized, soft rice cakes; the semi-glutinous rice is fermented in old earthen jars" (in villages of Dinalaoan, Lumbang, Ambuetel, and part of Nalsian).

Calasiao puto is made of long grain rice soaked in water, ground and fermented for three days of more, with just enough sugar to taste, and steamed. It can be topped with cheese or drizzled with chocolate syrup for variation. It is perfect to be paired with dinuguan. The town has the traditional white puto and many flavors like pandan (green), ube (violet), banana (yellow), strawberry (light red/pink) and cheese (gold).

The original white puto and kutsinta (another rice cake variety) is sold at P80 per kilogram (70 to 75 pieces), while the flavored ones are sold at P80 per kg. The price is higher by P15 to P20 in other areas to cover transportation costs.

Bella's Puto consumes three to six sacks of rice a day to make puto, depending on the season. Peak production period is from October to January. A sack of rice can produce 8,000 pieces or 107 kg of puto. Bella's Puto is sold at four SM shopping mall branches, in Santa Mesa (Manila), Baliwag (Bulacan), Clark (Pampanga) and Rosales (Pangasinan). It is also sold in a store in Caloocan and at the Pasalubong Center in Rosales town.

Bocayo (sweetened coconut) and dinuguan are also the best products of Nalsian Bacayao and Nalsian Centro. Calasiao celebrates its town fiesta every May 2 and 3: the feast day of Señor Divino Tesoro. Every 28 and 29 June is the fiesta of San Pedro and San Pablo, which were the dates of the Calasiao fiesta.
